

TTP-4HW and TTP-4HWX

4 MODULE HIGH WIND AND SNOW LOAD POLE TOP MOUNT

Mount 4 modules with a total area of 100 square feet or less on a 6-inch Schedule-40 or schedule-80 pole

- 85-inch rails per column accommodate 4 modules with widths up to 41.5 inches
- Mounts on user-supplied 6-inch schedule-40 or schedule 80 steel pipe
- Module clamps fit frames between 30 to 40 mm deep*
- No complex sizing documents or need to send module data sheets when ordering
- Heavy-Duty Steel structure and Tamarack 3.1 aluminum module mounting rails
- 10° to 60° tilt angle
- UPS Shippable
- **Engineered for 140 mph wind speed and 100 psf snow load**

**Deeper frames can be used by adding 50/50+ mounting clamp sold separately 89907*

Two versions are available:

TTP-4HWX ships *without* 2-inch Schedule 80 pipe - user must purchase 21-feet locally.. Ships in 4 boxes - 193 lbs.

TTP-4HW includes 2-inch pipe. Ships in 5 boxes. 266 lbs.

TTP-4HW and TTP4HWX								
Maximum Snow Load (PSF) for up to 100 sq.ft. module area								
Tilt Angle	ASCE 7-16 Wind Speed at Exposure B							
	90	95	100	105	110	120	130	140
0°	100	100	100	100	100	100	100	100
