User supplies: Vertical pole - 4-inch schedule 40 steel pipe (4.5-inch OD)
Horizontal Beam - 3-inch schedule 40 steel pipe (3.5-inch OD).

See table below to determined depth of imbedment of the vertical post. Add imbedment to height above ground for vertical post length.

3-inch horizontal beam must be a minimum of 5-inches wider than the 2-times the solar module width.
